

The Carbon Chronicle

VOLUME 9; NUMBER 11

CARBON, ALBERTA, THURSDAY, APRIL 16, 1931

\$2.00 A YEAR IN ADVANCE

NO CHANCE MADE IN MAIL SERVICE

As was announced in our last issue the C.N.R. had decided to cut the train service from Calgary to Edmonton, via Granger, to three times per week. However, this week we learn that after some re-arrangements, this train service will not be cut down, but instead the train will go through daily, except Sunday, from Calgary to Mirror. In this way Carbon's mail service of long standing, will be maintained, as the mail for this town comes out by the C.N.R. to Granger and from there it is brought by stage to Carbon.

The citizens of Carbon rejoice over the fact that our mail service will not be changed.

BARTHELMESS CHUMMY WITH MOUNTAIN LIONS

A silver-handled six-shooter has transformed Richard Barthlemess into El Puma, fearless Spanish bandit.

Not since "Scarlet Days," an early D.W. Griffith production, has the First National-Vitaphone star appeared in the character of such an outlaw.

The part is as it was written in the original best-seller, by Lanier and Virginia Bartlett. He derives his nickname from the pet puma, a species of mountain lion. "The Lash" comes to the Carbon Theatre next Wednesday evening, April 22nd.

In addition to the pistol, Barthlemess wears an outfit of black leather trimmed with silver braid. He also rides an ebony black horse.

"The Lash" was directed by Frank Lloyd. It is a historical romance of early California. Most of the picture was done outdoors on locations actually described in the novel, much of which is laid near Los Angeles.

An exceptional cast supports Barthlemess headed by Mary Astor, Marian Nixon, Robert Edeson, etc.

PICTURE SHOW CHANGED TO WEDNESDAY INSTEAD OF FRI.

From now on the "Talkie" at the Carbon Theatre will be shown on Wednesday night instead of Friday night. This change was made by the management of the circuit and should prove popular with the public.

The next show will be on April 22, and will be Richard Barthlemess in "The Lash."

ENGAGEMENT ANNOUNCED

Rt. Hon. R. B. Bennett last week announced the betrothal of his sister, Miss Mildred Bennett to Major William Duncan Herridge, of Ottawa, and recently appointed Canadian ambassador at Washington, D.C.

ANNUAL MEETING OF THE CARBON GOLF CLUB

The Annual meeting of the Carbon Golf Club will be held in the Municipal Office, Carbon, on Friday evening, April 17th, at 8 p.m. sharp. Everyone interested in the sport is asked to attend this important meeting.

CARBON CHAUTAUQUA TO BE HELD JUNE 15, 16, 17, 18

The guarantors of Chautauqua in Carbon received word this week that the Carbon Chautauqua will be held on Monday, Tuesday, Wednesday and Thursday, June 15, 16, 17 and 18. With the present depression it may be hard for the committee to put over Chautauqua this year, but with full co-operation of guarantors and citizens of the town and district it is expected that enough tickets can be sold to meet the guarantee.

ALBERTA NEWS

The Pine Lake Hotel is again up for sale, this time by tender. The sale includes Hotel buildings, land, boats, etc.

The Innisfail Golf Club has extended an invitation to all lovers of golf in the district to become members of their club, through an advertisement in the Olds Gazette. Olds is a neighboring town.

The top price at the Calgary annual bull sale was reached when A. Reddon of Olds paid an even \$800 for "Prince Domino 33rd." Five hundred and seventy bulls were disposed of at the sale.

At a meeting of all those interested in the stampede, which was called in Carstairs recently, no one turned out, so it is expected that that town will be without their annual attraction this year.

Celebrating the event of the passing of the Gleichen Irrigation by-law the Gleichen Call issued a special number containing approximately 460 inches of advertising. The Gleichen Call's regular advertising space has only been about 100 inches. The citizens of Gleichen should support their local paper a little better than they do.

The services of Mrs. L. Mackay, as welfare worker for the City of Drumheller and the Municipal districts of Mecheche and Carbon, will be retained for at least one more month.

OLD SPARK PLUGS REDUCE HORSEPOWER OF YOUR CAR

An automobile as it becomes older, gradually loses power. This power decrease is so gradual that the owner may not appreciate its extent until the sluggishness becomes too apparent. Of course this trouble is not always due to spark plugs, but an interesting fact made recently shows that a motor—with plugs that had been used for more than 12,000 miles—when run at an engine speed equivalent to 20 miles an hour, developed 31.2 horsepower. The same motor run at the same speed equipped with a new set of spark plugs gave a horsepower rating of 33.0, an increase of 6.8. The matter of spark plugs and maximum engine performance is a most vital one and service men are endeavoring to get this information to car owners. In doing this they are observing the speedometer on every car that comes into the shop, and recommending a new set of plugs every 10,000 miles.

H. LUFT'S FARM HOUSE DESTROYED

Thursday morning about 9 a.m. word was phoned in to Carbon that Henry Luft's farm house, about five miles from Carbon, was on fire. Immediately a number of the citizens set out for the scene of the fire, but little assistance could be given as the fire had spread rapidly and with the high wind blowing at the time, it was not long before the building was in ashes.

The fire started when gasoline, in which Mrs. Luft was cleaning clothes, exploded and the flames spread rapidly throughout the open doors of the house. Mrs. Luft was burned about the arms and face, but not seriously. So quickly did the fire spread that the family only succeeded in getting out of the house and the building and contents were quickly demolished.

We understand that about \$2300 insurance was carried on the building and its contents.

The Luft family being left homeless, the people of Carbon and district came to their assistance and donations of every description from cook houses to clothing were made to the family.

Southern News

Mr. J. J. Ohlhauser was rushed to the Calgary hospital last week, suffering from an attack of appendicitis. We understand that he is progressing favorably.

Born to Mr. and Mrs. Art Neher, on Monday, April 6th, a daughter.

Those who were at the home of Mr. and Mrs. Ed. Selgman for dinner on Sunday were Mr. and Mrs. Harrison of Calgary, Mr. and Mrs. Bill Harrison, Wilburn Corner, Mr. and Mrs. Adam Bertsch and children, and Hilda Kary.

Miss Erna Remphew went home on Sunday after she had spent two weeks with Mr. and Mrs. Henry Kary.

MRS. GEORGE MARSHMAN DIES SUDDENLY MONDAY

Mrs. Cora Ellen Marshman, pioneer resident of the district, died suddenly on Monday afternoon at her home, eight miles south of Carbon. She was 56 years of age.

Mrs. Marshman was a former resident of Oregon, and was one of the earliest pioneers of the district, having settled on the old colonization farm. After a period spent in Oregon, Mr. and Mrs. Marshman moved back to their farm, and resided there until 1920, when they rented their place. They resided in Eugene, Oregon up till a month ago, when they again returned to their farm.

The late Mrs. Marshman is survived by her husband, George; one daughter, Mrs. Carl Swanson of Corvallis, Ore.; one son, Robert, at home; one sister, Mrs. Baughman, of Tekoa, Wash., and two brothers.

Funeral arrangements are in the hands of Foster and Foster's funeral home, of Calgary.

(Mrs.) C. A. CLARK JR., Teacher

DAUGHTER OF MR. & MRS. H. LONGSTAFF, SWALWELL, HURT

The 12-year old daughter of Mr. and Mrs. H. Longstaff of Swalwell, met with an almost fatal accident last week in Calgary. When playing the children broke a huge vase and in so doing the girl was unfortunate in cutting an artery behind the knee, and before medical aid could be summoned the child almost bled to death. A blood transfusion was made and the latest reports are that the child will recover.

BRUCE RAMSAY HAS CAR ACCIDENT

What might have proved a serious accident happened on Thursday morning of last week when the car, in which was the driver, Bruce Ramsay, and his two sisters Kate and Mabel, skidded into the steel bridge near S. Hay's farm. It appears that the car was travelling at a fair rate of speed and in making the turn at the bridge, the rear wheel of the car caught in the end of the structure and the jar hurled the occupants forward. Kate Ramsay was the only one hurt, having received a cut on the face, which required a couple of stitches. The car was not seriously damaged.

ALBERTA POLICEMAN WOOS WIFE OF MISSING FRIEND; TRAPS HER FOR MURDER

Charles MacLean, former Alberta Provincial Police Corporal, enjoys the unique distinction of having solved a baffling murder mystery by making love to the beautiful wife of a missing friend, eliciting information in his courtship of the self-made widow which led to her conviction of the murder of her mate. Recital of the details of his love-making detective role, remarkable in the annals of Canadian crime detection, is set forth for the first time by Mr. MacLean in the April issue of "The Master Detective" magazine. The article is illustrated by official photographs from files of the Alberta Provincial Police department.

In patrolling his district Corporal MacLean made friends with a settler named John Dougherty in Beaver Lodge, Alberta. One day when MacLean was making his rounds he came across Dougherty, who seemed worried. Questioned, Dougherty said he was afraid his wife was trying to poison him. A few months later he was passing the Dougherty homestead and Mrs. Dougherty called him in and said that Dougherty had gone to Sexsmith, a settlement 150 miles away, in search of work.

After months had passed by and Corporal MacLean had had no word from his friend, he became suspicious and examined letters Mrs. Dougherty said she had received from her husband in Sexsmith. They looked like forgeries so he sent a letter to Dougherty, which in a few days was returned with the notation that Dougherty had not been in Sexsmith. This clinched the policeman's growing suspicions that Mrs. Dougherty had murdered her mate, and he puzzled his brain how he could get Mrs. Dougherty to drop a bit of information which would trap her. Finally he hit upon a plan of action.

The policeman decided to turn lover. Apollo was to be added to the bag of

REGULAR MEETING OF CARBON M.D.

The regular monthly meeting of the Municipal District of Carbon was held in the Municipal office, Carbon, on Friday, April 10th. The councillors present were: S.N. Wright (reeve); G. H. Webber (Dep. reeve); Gottlieb Ohlhauser, W. H. Levins, C. G. McMann, H.H. Crowell and O.M. Grieve.

The usual routine business was dispatched, the following items of which should be of interest.

The Council decided to make application for the Capital Grant of \$5000—\$4000 of which is to be spent on a 50-50 basis in Division 2 on the District Highway south from Carbon and \$1000 to be spent on a 50-50 basis in Division No. 3 on the District Highway on the south side of Section 27-29-22 W. 4th.

The Council also decided to accept the Income Grant of \$16850—\$1000 of this amount to be spent on a 50-50 basis in Division No. 4 on the road East and South from Hesketh. \$342 to be spent on a 50-50 basis in Division 1 on the road on the north side of Section 24-30-27. \$342 to be spent on a 50-50 basis in Division 5 on the Kirkpatrick-Orkney road.

A draft form of agreement was submitted by the Board of Drumheller Municipal Hospital District No. 3 and the Council of the Municipal District. By the signing of this agreement it is agreed that the Hospital accounts of indigent persons would be \$2.60 per hospital day with a maximum of \$200 for each indigent person. In the case of residents the rate is \$3.00 per day.

A circular letter from the Deputy Minister, Department of Municipal Affairs regarding an arrangement between the Federal and Provincial Governments in connection with seed grain, was read. It was decided that the Council prepare a By-Law pursuant to the temporary Seed Grain Advance Act 1931, in order to enable the Municipal District of Carbon to obtain enough money to supply seed grain. This By-law was prepared and, all councillors being present, it was given the necessary three readings and was passed.

tricks of crime detection. After a short campaign the beautiful wife of the missing man succumbed to the wiles of the persistent love making policeman. As the strange romance progressed, the Borgian creature began to have visions of annexing the policeman to herself as a permanent mate. MacLean protested against such obvious arrangement, asking what they would do if Dougherty came back. To which the vampire replied that he would never come back.

The desire of Mrs. Dougherty to permanently have the policeman led to her giving information which led to the discovery of the body of her husband, and her subsequent conviction of manslaughter. Her charms were used effectively in the court to ward off conviction of first degree murder.

This strange story in "The Master Detective" magazine of an Alberta policeman who turned lover to trap the murderer of his friend is sure to receive wide comment in Canada and the United States, to which country Mrs. Dougherty was deported in 1926.—Exchange.

A New Order Prevails

In the business and financial section of one of the most conservative (spelled with a small "c") papers in Canada we find the following paragraphs:

"That our present economic scheme is seriously at fault surely no reasonable person will deny. The existence of hunger and want in the midst of plenty—the fact that the existence of this abundance of supplies is itself responsible, at least in part, for our present condition, surely constitutes uncontrovertible evidence of our economic unsoundness.

"Argue as we may as to the respective responsibilities for the current depression of the various immediately contributory factors such as over-production and under-consumption of commodities, shortage of gold, hoarding of gold, demonetization of silver, tariffs, war debt, etc., the fact remains that our present economic system doesn't work. It functions increasingly poorly even in 'good' times; its breakdown is immediate and shocking when bad times recur."

The fact that Big Business, our industrial magnates and captains of finance, as well as the workers, now recognize this fact is, perhaps, the most hopeful sign of all. There was a time when everybody everywhere accepted "bad times" as inevitable sooner or later. But not now. The world is at last coming to a realization of the truth that many of our economic ills are largely man-made, and, therefore, capable of both prevention and cure by man-made methods. Cure and prevention will not be brought about by any one magic formula, nor can it be accomplished over-night. The process of developing solutions may be slow and painful. We will probably have to discard many pre-conceived ideas, and accept policies formerly rejected as impracticable and utopian.

For example, there is a growing acceptance of the fact that the old idea of nationalism as opposed to internationalism must give way. The Great War has taught all nations at least one lesson, namely, that no one nation can live unto itself alone; that, on the contrary, each nation is dependent on other nations whether they like it or not. Recognition of this fact led to the creation of the League of Nations to direct the world's thought in relation to matters of peace and war. Deliberations of the League Assembly soon revealed that the issue of peace or war was not confined to the solution of racial problems, or the adjustment of boundary disputes, or the eradication of designs by one nation on another for purposes of gain and glory. The maintenance of peace, or the outbreak of war, was found to depend, in many cases, upon the illiteracy of a people, upon the social conditions under which they lived, upon their sharp contrasts of great wealth on the one hand and grinding poverty on the other, upon their ability to sell and buy what their necessities demanded they should buy. Hence the League of Nations today is scientifically studying every conceivable subject in relation to the welfare of all nations and races.

This lesson was not learned at once, and immediately following the Great War, nations everywhere adopted policies with a view to making themselves self-contained. Where one adopted policies to that end, others followed. Instead of recognizing and profiting by the lesson taught by the war, they ignored it and went to extremes. That is one of the outstanding reasons for and causes of the present world depression and stagnation in business. A man conceivably can live and eke out an existence on his own farm, refusing to have any relations whatever, business or otherwise, with his neighbors, but he will deny himself all the enjoyments, refinements, and many of what we now regard as the necessities of life. Never will he become prosperous. And so it is with nations.

As Miss Agnes McPhail, M.P., told the recent Teachers' Convention in Saskatchewan, the world is facing an entirely new order. Instead of confining our thought and our policies to an extreme nationalism, we must become internationally minded. She declared that most people were internationally illiterate, and were not conversant with conditions existing in the world and the relation which one part bears to the other. People have not kept pace with the trend of the times, whereby the day of the self-contained and independent nation has given place to a new era of inter-dependence of nations. And because we have not realized how completely the world is inter-dependent, we are still trying to solve our problems with yesterday's methods. They won't work because the world has moved to a new condition; the old is gone forever.

We must take that lesson to heart, and govern ourselves accordingly. We cannot be prosperous if other nations are not. Their prosperity is absolutely essential to our own well being.

CORNS

Lift off - No Pain!

Just a drop or two of Putnam's on any sore corn and out comes all the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

PUTNAM'S

Find Centuries Old Trees

Discovery Is Made Of Ancient Buried Trees In Quebec

Quite recently some white birch trees which had been buried for centuries were discovered in the vicinity of the village of Riviere St. Jean, Quebec, by a field officer of the Topographical Survey, Department of the Interior. The remarkable thing about these trees was their state of preservation. Specimens were presented to the Forest Products Laboratories, Department of the Interior, at Ottawa, whose officers state that preservation was due to a surplus of water and a deficiency of air, conditions inhibiting the growth of wood-decaying fungi.

Good News For Aviators

Device To Keep Ice Off Wings Of Plane Is a Success

Victory was reported at Akron, O., over one of the aviator's most dangerous enemies—ice that forms on the wings of his aeroplane and sometimes causes it to be wrecked.

Through low-hanging clouds, at freezing temperature and an altitude of 2,000 to 3,000 feet, Charles Meyers, of Cleveland, piloted his aeroplane, which was equipped with rubber "overshoes."

The overshoes—pouches of a specially treated rubber fabric fitted over the leading edges of the plane and wings and struts—were made to "breathe" as the ice formed on them. As they breathed the ice crumpled away.

The inflation and deflation, which worked like a man's lungs, were created by a motor-driven air pump in the cockpit.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an important dress—lost color so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason, she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully. I have a lovely new dress that really cost just 15c—the price of one package of Diamond Dyes.

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to be made so they always go on smoothly and evenly. They never spot, streak or run; and friends never know the things I dye with Diamond Dyes are redyed at all."

Mrs. R. F., Quebec.

Reciprocal Trade

Would Refrain From Advertising Dominion Products In Britain

Rt. Hon. J. H. Thomas, secretary for Dominion Affairs, was asked by a questioner in the British House of Commons to consider the advisability of refraining from further advertising Dominion products on Empire Marketing Board hoardings in Britain, "until a scheme is evolved whereby similar advertising of British goods can be shown in the Dominions."

The minister replied in the negative. The questioner, he added, "is asking me to agree to something that would be a violation of the bargain we have made with the Dominions. I am endeavoring to ask them to reciprocate in other ways, but to say that unless you do it we refuse to give you the effect of our part in the bargain, is rather wide."

Wonderful For Indigestion!

When your stomach feels bad; when Gas, Sourness, Nausea or after-eating pains make you feel miserable—a single dose of pure Bismarck Magnesia will bring almost instant relief!

For indigestion, the prompt effectiveness of BISMARCK MAGNESIA is really wonderful. Even the most obstinate cases quickly respond. Pleasant and inexpensive to use. Ask your druggist.

The average height of an Englishman is 5 feet 9 inches, of a Frenchman 5 feet 4 inches, and of a Belgian 5 feet 6 1/2 inches.

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectually that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

ENO'S FRUIT SALT

Doctors Warn Against Drastic Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENO'S "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that its daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

An Unfamiliar Country

Few Canadians Know Very Much About Argentina

Canada stretches across the north half of North America. Argentina occupies the greater part of the southern extremity or "tail" of South America. Argentina's length from north to south is approximately two-thirds of Canada's from east to west. Its population is perhaps a million greater than Canada's. Its largest city, Buenos Aires, is three times the size of Toronto, and, with its 2,225,000 inhabitants, ranks as the world's eighth. They are (in millions of population): London, 7.74; New York, 6.93; Berlin, 4.01; Chicago, 3.37; Paris, 2.83; Osaka, 2.40; Tokio, 2.29; Buenos Aires, 2.22. Argentina has four other cities larger than Hamilton, Ont., ranging in population from 460,000 down to 170,000, whose names (Rosario, Cordoba, Avellaneda, and La Plata), are quite unfamiliar to the average Canadian reader. But the opening of the British Trade Exposition in Buenos Aires, and the visit of the Prince of Wales to Argentina, has drawn all eyes to that far and unfamiliar country.—Toronto Star.

Volume Of Eskimo

Poems Just Published

Translated Into English By Arctic Explorer Should Be Interesting

Knud Rasmussen, the Arctic explorer, has sprung a surprise upon the world.

He has celebrated his return to civilization, after many years of wandering in the wilds, by publishing a volume of poems by Eskimos.

It will be interesting to see the poems in English. We may be sure Rasmussen has presented them worthily in print, for, with his European education, he has the advantage of being himself half an Eskimo, and so thoroughly understands his subject.

It seems natural for primitive people to talk of wild picturesque poetry, unrhymed, but full of beauty and imagination, such as we see fixed for all time in the musical names which the Red Indians gave to rivers and lakes and mountains in their native land.

It will be remembered by some that scholars have declared the Eskimo language contains only about two hundred words which should add greatly to the labors of the poets.

Was Weak and Run Down

Could Scarcely Do Housework

Mrs. Edward A. Allen, Bezancon, Alta., writes:—"I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework, in fact, I would have to lie down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Sold by all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Need For Adjustment Of Weights Of Hogs Marketed To Conform To Requirements

Time and experience are great teachers—but only for intelligent people. The official grades for hogs have been established a considerable length of time and production and marketing under the system have now been carried on during wide variations in conditions both as affecting production and the manufacture and distribution of the product.

For years conditions in production were such that producers were all the time inclined to put their hogs on the market in a somewhat unfinished condition. The results were, too big a percentage of light hogs and many otherwise good hogs within the prescribed weights yielding thin bellies. As the belly makes the valuable breakfast bacon this weakness in the product was important.

In a system of grading hogs alive the determination of whether a belly was finished or not was exceedingly difficult. However, comparisons of live gradings with dressed tests revealed the fact that most of the thin bellies came from the lighter hogs within the bacon grades. Therefore, to secure the proper quality in the high grade product, it was agreed to raise the minimum weights of the bacon grades ten pounds.

But producers were anxious to maintain the spread between the minimum and maximum weights of the grades and it was at the same time agreed that the maximum weights should also be raised ten pounds. Packers always recognized that the inclusion of these heavier weights within the better grades of hogs was dangerous, because demand for hams, backs or breakfast bacon for the domestic market or of Wiltshire side bacon for the export market of the weights that hogs from 220 to 230 lbs. yielded was very limited at the best prices. However, as the numbers of hogs of these weights were not at the time in such great supply as to constitute a burden, the producers' requests were acceded to. And as long as these conditions prevailed no harm was done.

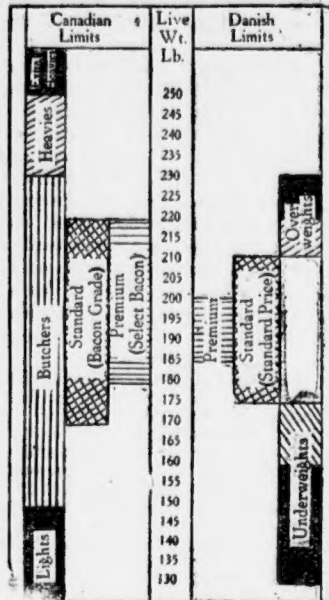

This year we have run into producing conditions which have proved that in the effort to correct the former condition the proper limit of weights was over-reached. An excess of weighty hogs in all of the three main grades has seriously affected the sale of the product and has been a very depressing factor in the market. It is also very dangerous from the standpoint of our prospective entry into the export market.

There is, therefore, a need for an adjustment of the weights of the bacon and select bacon grades to 180 to 220 lbs. at the farm or fed and watered, and of the butcher grade to 150 to 230 lbs., and when and if conditions should in the course of some years again make desirable a slight swing of 10 pounds in the weights it would appear reasonable that arrangements should be made so that this could be done expeditiously. But producers plead that there should be stability in the weights for each grade. Insistence on absolute stability will not work to the advantage of the producer or of the industry as a whole, but if this view is to prevail then undoubtedly the weights will require to be moved back to those that will, on the average, give the desired product, and be left there. The weights from 180 to 220 lbs. at the farm, or fed and watered, yield the Wiltshire cuts from 55 to 65 lbs. that are in demand and the weights of hams, bellies, backs and loins that are most desired by the domestic consuming trade. Then, when feeding conditions change and there is again a tendency for considerable percentages of unfinished hogs to come to market, these will have to be excluded from the higher grades by rigid grading of the lower weights for quality.

In connection with standards of weights the accompanying chart showing a comparison of ours with the Danish standards is very illuminating. The Danish standards, it will be noticed, are very much narrower than ours. Their standard grade on a live basis weighs from 175 to 210

lbs., and their premium hog only from 185 to 200 lbs. The Danes discount all hogs under 175 lbs. and over 210 lbs. These weights are calculated from dressed weights at the factory and would be for reasonably empty hogs. They would correspond more nearly to our weighed off car weights, which are ten pounds lighter than our farm or fed and watered weights.

Hog Grades Compared

The chart compares the weight limits of the official grades of hogs in Canada and Denmark. It will be noticed that the grade equivalent to our "Select Bacon" for which the Danes pay a premium has a spread of only 15 pounds—from 185 to 200 lbs. against our 40 lbs. The Danish standard grade, equivalent to our bacon grade, has a spread of only 35 lbs. against our 50 lbs. There is no grade in the Danish system equivalent to the butcher, but overweights and underweights start directly from the standard with, in each case, a discount in price. The Danish grades do not provide any place for hogs under 130 lbs. or over 230 lbs.

The world's earliest farmers lived in the New Stone Age about 10,000 years ago.

CHINESE MURDER MISSIONARY

Mrs. Victoria Miller of Glendale, Calif., who was one of two women missionaries reported murdered at Yamanfu, China, while they slept, by hatchet blows believed delivered by discharged servants.

Market In the Orient

Sees Solution Of Economic Problem In Trade With Asia

Asia was the unexploited part of the earth toward which industry should now bend all its efforts for marketing, R. J. Cromie, publisher of the Vancouver Sun, declared before the Advertising Club of Montreal, recently. Bankers of the world should find a way of re-establishing silver at some fixed level of value or giving Asiatic people currency that would be good for world commerce in order to facilitate their buying, the speaker declared.

"A sick world economically is no different from a sick industry or a sick financial institution, and there is little difference in the treatment required, except that to cure successfully depressed world conditions it is necessary to think in an international way. You and I as an individual are helpless to restore the buying power of silver countries like China and India, which will in turn restore the buying power of Europe, and set in motion the huge surpluses that are piled up all over the United States and Canada. And the world's business depression will not be lifted until we start these surpluses moving," Mr. Cromie said.

Canadian Copper Ore

Copper ores of various kinds, including the native metal, are found at many places throughout Canada, but only the sulphide ores are commercially important.

Splendid Services Of The Community Doctor In West Noted By American Investigator

Western Indians Are Raising More Stock

Industry Has Developed Rapidly In Last Few Years

The stock-raising and farming of the Indians of the western provinces has developed rapidly in the last few years, says W. M. Graham, Indian commissioner.

Thirty-five bulls were purchased at Regina and 11 at Brandon, he stated, and a large number were bought at the Calgary Fair.

"These bulls are paid for from a fund created by the Indians themselves," he said. "Each Indian pays so much into the fund every time he disposes of an animal from his herd. It is well known that the Indians have some of the finest cattle in the Western provinces and have taken prizes at many shows held at different places."

"They own more than 20,000 head and dispose of between 3,000 and 4,000 head every year. The estimated calf crop this year is expected to be between 6,000 and 7,000 head."

Demand For Better Beef

Well Finished Young Cattle Means Money To the Producer

The beef grading service of the Dominion Department of Agriculture, which is closely in touch with consumer preference for beef, recently stated: "One thing clearly apparent in the market at the present time is the demand for better beef." The market preference today, the Department adds, is for well finished young cattle weighing around 900 to 950 lb. live weight, dressing out around 525 lb. This type of animal, properly finished, means money to all concerned.

Spruce and Balsam Cones

The cones of the spruce hang down from the branches; those of the balsam fir (or "balsam") stand upright. The species are thus easily distinguished when the trees are bearing cones, states the Dominion Forest Service of the Department of the Interior. The two species mentioned are the ones chiefly used in the manufacture of wood-pulp.

The human body is 60 per cent. water.

The community doctor serves 32 rural communities in Saskatchewan on a full time or part time basis, according to a report made by Dr. C. Rufus Rorem to the committee on costs of medical care, at Washington, a private organization which is making a five-year survey of the financial end of medicine. These Saskatchewan country doctors as well as three physicians employed for their full time by three municipalities in Manitoba, are paid out of public funds.

Dr. Rorem in his report says: "Saskatchewan has for some years taken the lead in the Dominion of Canada in the matter of sanitation, immunization against contagious diseases and other preventive measures and has recently inaugurated a system by which all residents of the province requiring hospitalization for tuberculosis may receive both institutional and medical care at no direct cost to themselves."

Municipal doctors, Dr. Rorem found, were usually hired when communities found their existing medical services were inadequate or too costly, or when physicians who had previously served them died or moved away.

Dr. Rorem said the average salary of the full-time physicians in Saskatchewan is \$4,000 and to this many physicians were able to add considerable sums through fees which they were allowed to charge.

"In a general way," he said, "physicians appear to consider their net incomes are larger under the municipal doctor system than in private practice in the same localities."

No rural municipality which had adopted the municipal doctor system has gone back to the private practice basis.

Preference For Canadian Wheat

Britain May Make Offer Of Coal In Exchange For Wheat From Dominion

Quota preference for Canadian wheat in the British market in exchange for a Canadian market for British anthracite coal will be one of the proposals advanced by the British Government at the Imperial Conference to be held in Ottawa during the summer, according to an editorial forecast in the London Daily Express. "Well done, Socialists," comments the editorial, in reference to the presumably reliable report that the Labor Government intends to give the British farmer a quota on his wheat. Under the proposed scheme the use of at least 15 per cent. British flour in all bread would be made compulsory. But the newspaper anticipates the government will not stop there.

"They have every intention," it says, "of going to the Imperial Conference at Ottawa this year, determined not to repeat last year's fiasco. Canada too will be offered a wheat quota. The price asked will be a Canadian market for British anthracite coal."

First Woman Flier

The first female aeronaut was one Madam Tibe or Thible. She joined the painter Fleurant aboard a balloon, called the Gustave, which ascended at Lyons, France, on June 4, 1784, in the presence of the royal family of France and the King of Sweden.

"Was it a dangerous operation?" "What! Do you think a doctor would perform a dangerous operation for 15?—Gutierrez, Madrid."

A SIR SAMUEL CUNARD, Founder of the Cunard Line.

B SIR PERCY E. BATES, Bart., G.B.E., Chairman of the Cunard Line.

C R. W. REFORD, Esq., Canadian Director of the Cunard Line.

The above photograph gives some idea of the immense size of the new Cunard liner at present under construction. If the liner were placed on its end the bow of the ship would be more than five hundred feet higher than the top of the highest building in the British Empire.

Also pictured above is Sir Samuel Cunard, born in Halifax, N.S., who founded the Cunard Line in 1840. The present chairman of the Line is Sir Percy Bates, Bart., G.B.E., while R. W. Reford, of Montreal, is Canadian resident director of the company.

SUNDAY SCHOOL LESSON

APRIL 19

THE RICH MAN AND LAZARUS

Golden Text: "Lay up for yourselves treasures in heaven, where neither moth nor rust doth consume, and where thieves do not break through nor steal."—Matthew 6:20.

Lesson: Luke 16:1 to 17:37.

Devotional Reading: 1 John 3:13-18.

Explanations and Comments

The Parable Of the Rich Man and Lazarus, 16:19-31.—We call this rich man of the parable "Dives," making use of the Latin word for "rich man." Dives was clad in purple and fine linen; his outer garment was dyed purple, and his inner garment was made from a sort of flax that grew on the banks of the Nile, so finely woven as to be almost transparent. "Purple and fine linen" is a phrase used to this day for luxury and ostentation.

"We remember with sorrow and compassion the idle rich, who have vigor of body and mind and yet produce no useful thing. Forgive them, Heavenly Father, for loading the burden of their support on the bent shoulders of the working world. Forgive them for wasting in refined excess what would feed the pale children of the poor. Forgive them for setting their splendour before the thirsty hearts of the young, luring them to theft or shame by the lust of eye and flesh. Forgive them for taking pride in their selfish lives."—Walter Rauschenbusch.

Lazarus (the name is a contraction of Eleazar, "Helped of God"), was a beggar who was brought to the rich man's gate, where he hoped to be fed from the crumbs that fell from the rich man's table. So helpless was he that even the dogs came and licked his sores. Wretched dogs roamed the streets and lived upon the garbage that was thrown out from the houses. The suggestion is that the dogs were kinder than the rich man, or else that they increased his misery by rasping his sores.

When the beggar died, he was carried away by the angels into Abraham's bosom. "Abraham's bosom" is a Jewish name, not of heaven, but of an intermediate state of bliss, in which the souls of the just await the resurrection. In His parable Jesus made use of the well-known rabbinical fancies—angel bearers, Abraham's bosom, the two divisions of Hades, the separation and yet communication between them—but His doing so does not mean that He accepted these fancies for the truth. His purpose in His story was not to reveal the nature of the life hereafter, but to teach that retribution overtakes the sinner, and in doing this he deliberately adopted the picture language then current which admirably suited his purpose.

The rabbi said, "The fire of Gehenna has no power over the sinners of Israel, for Abraham descends and rescues them from it." In accordance with this thought, the rich man, who had also died, appeals to Abraham from his place of torment and begs him to send Lazarus to his aid, if only with water on the tip of his finger. But Abraham bids Dives to remember that in his lifetime he had had the good things while Lazarus had had the evil; now Lazarus is rewarded while he's punished.

The Terror Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one tries the remedy of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

On Threshold Of Discovery

Dr. John Anderson, formerly of the London school of tropical medicine, died at Shanghai, China, after an operation, just when he believed himself to be on the threshold of a crowning achievement in his research into cerebro spinal meningitis. It is understood he succeeded a short time before in isolating the meningitis germ.

Your Home Medicine Chest.

Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.

Dream May Be Realized

Dr. Hugo Eckener, Zeppelin commander, bade America goodbye seeing realization of his dream of scheduled trans-Atlantic airship flights by 1933. In ten years, Dr. Eckener believes, two sailings a week in either direction will be made.

DEPRESSION

"I'm a different woman"

"Two years ago I began to get depressed, and everything was too much trouble for me. I was a misery to myself and everyone around me. I was advised to take Glauber Salts by my friends who said it was the same as Kruschen but it did me no good, so at last my husband got me a bottle of Kruschen and no one would realise the different woman I am. I have been taking Kruschen now constantly for two years. My daughter also would not be without it. I have got my neighbour to take Kruschen as well and she has found its worth as she feels a different woman."

—(Mrs. G. A. K.)

The commonest cause of depression is partial constipation—an insidious complaint because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirits, sap the nervous strength and lower the whole vitality.

Kruschen Salts make constipation impossible. Therefore, if you keep to Kruschen you need never know the meaning of melancholy; never feel "nervy" or depressed.

Granny Rides a Motorcycle

Sixty-Year-Old English Woman Is Quite An Enthusiast

In the face of the displeasure of her grandchildren, Mrs. Clara Brown, aged 60, recently rode from Leamington to London on her motorcycle to attend the annual dinner of the London Ladies' Motor Club, in honor of Sir Malcolm and Lady Campbell and other racing drivers. She rode in overalls and waders, with her dinner gown strapped on the handle bars. Three years ago Mrs. Brown took part in a six-day motor trial and recently won a Concours d'Elegance, wearing a riding outfit which she made herself.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

Synthetic Air

Better Than Natural Air, According To Scientists

Science believes it can give mankind synthetic air to breathe that is better than the natural atmosphere, the American Chemical Society was told.

Professor J. W. Hershey, McPherson College, McPherson, Kas., said experiments have shown that life can be sustained more healthfully with a chemically concocted atmosphere, which can be manufactured and introduced in office buildings, airplanes and submarines, than with the nitrogen-oxygen that surrounds the world.

Experiments with white mice showed that in some cases they lived more healthfully in helium-oxygen than in nitrogen-oxygen, Professor Hershey said.

A strangely mottled discolorization which attacks otherwise healthy teeth of children in certain parts of the country, notably Texas, is due to the chemical element fluorine, according to R. V. Churchill, who described his investigations before the convention.

The fluorine discolorization, which apparently does not cause tooth decay but is located under the enamel, comes from the fluorine element sometimes present in drinking water, Churchill said.

Persian Balm is a sheer delight to use. Cools and relieves irritations caused by weather conditions. Imparts a rare charm and beauty to the complexion. Fragrant and velvety smooth. Never leaves a vestige of stickiness. Swiftly absorbed by the tissues and stimulates the skin. Persian Balm is the peerless toilet requisite. Every woman will appreciate the subtly distinctive charm achieved by the use of this magical lotion.

SELECTED RECIPES

FLORADORA PIE

- 2 cups pineapple diced.
- 3 tablespoons butter.
- 3 tablespoons Benson's Corn Starch.
- 1 cup cocoanut.
- ½ cup sugar.
- 4 egg yolks.
- Juice and rind of 1 lemon.
- ¼ teaspoon salt.

Blend the sugar with the corn starch and add to the malted butter. Stir in the other ingredients and cook until thick in a double boiler. Put in a baked crust and cover with meringue.

The leaning tower of Pisa was never upright because the foundation began to sink before the construction was completed.

WIDER POWERS ARE SEEN FOR THE DOMINIONS

Ottawa, Ont.—Statute of Westminster has been approved by representatives of the nine provinces of Canada. A section of this proposed act, however, will contain definite safeguards of the Canadian constitution. This section, which was left to Canada to draft, ensures that the Statute of Westminster cannot repeal or amend the British North America Act.

This was the net result of the Dominion-Provincial conference which concluded here. An official statement, handed out after the conference, announced that a final draft of the Canadian clause in the Statute of Westminster was now in the hands of the provincial representatives. While approved by the conference, this draft would be taken home for submission to the provincial governments. Two weeks has been allotted for discussion by the provinces.

Now that the clause is under consideration which will set at rest any fears that the B.N.A. Act might be altered by the Statute of Westminster, the question of how the B.N.A. Act can be changed as the occasion for amendments develops is to be taken up at some further conference in which the Dominion and the provinces will take part. This was announced by Premier Bennett.

Many changes to the act, which is Canada's constitution, defining provincial and Dominion rights, have been made from time to time, but the parties are for the most part in agreement that where a change of importance is to be made, all the provinces must consent. The conference will seek to arrive at the most satisfactory method of making changes.

Adherence to the Statute of Westminster means widened jurisdiction for the Dominions of the British Empire. It provides that the Dominion may enact extraterritorial laws. It declares the Dominions will no longer be subject to British statutes unless they so desire. It repeals the Colonial Laws Validity Act. It gives legal approval to the claim of the Dominions to equality of status in the British Commonwealth.

If the provinces approve of the clause which was agreed on at the conference, the next step will be taken by the Dominion Government at the present session of parliament. A resolution or bill will be introduced expressing Canada's adherence to the statute. The Imperial conference of last year agreed that the Dominions should express their attitude toward the statute by August. If there is general agreement, the Imperial parliament will be asked to pass the Statute of Westminster.

Royal Grain Commission

Chief Justice Brown May Be Appointed To Represent West

Ottawa, Ont.—Chief Justice J. T. Brown, of the Court of King's Bench, of Saskatchewan, is likely to be the third member of the Royal Grain Commission to inquire into trading in futures. Chief Justice Brown would represent the prairie provinces.

Sir Josiah Stamp, eminent London (England), economist, has been named as chairman of the commission. The representative of the Grain Exchange will be W. Sanford Evans, Winnipeg, whose selection has already been approved.

President Of Rifle Association

Ottawa, Ont.—At the annual meeting here of the Dominion of Canada Rifle Association, Lieut.-Col. D. R. Street, of Ottawa, was elected president. He succeeds Brig.-Gen. J. Duff Stuart, of Vancouver. Proposals for increasing the prize lists at the rifle matches to be held at Connaught Ranges next August were approved.

Plans Pacific Flight

Tokyo, Japan.—Captain Thomas Ash, arriving in Japan aboard the liner "Heian Maru," announced he had hopes of obtaining the use of the aeroplane of Harold L. Bromley for a projected non-stop flight across the Pacific.

W. N. U. 1885

Chicago's New Mayor

Mayor-Elect Cermak Busy With Re-Organization Of Municipal Government

Chicago.—Speedy re-organization of Chicago's municipal government was promised by Mayor-elect Anton J. Cermak.

The new mayor will have a working majority in the city council, considerably enhanced by victories which accompanied his own success. Thirty of the city's 50 aldermen are Democrats. Nine of the 20 Republicans were classed as allies of Mayor Thompson.

"What are you going to do about Al Capone?" British reporters asked on the 'phone.

"I understand he is out of town," replied Cermak, "and my advice to him is to stay out for the next four years. He is under sentence here you know, and I suggest that he stay in Florida, that's where he belongs now."

Cermak laughed when the London writers asked about Thompson attack on the King.

"He didn't really fool you people, did he?" chuckled the mayor-elect. "No, he isn't really anti-British. The British vote is the smallest in Chicago, so he decided to pick on the British King. No, I haven't anything against King George or any other king."

Importance Of Wheat Conference

Robert Gardiner Says Hopes Of Western Agriculture Depend On Outcome

Calgary, Alberta.—Upon the outcome of the wheat conference in London, England, next month, the hopes of western agriculture depends, according to Robert Gardiner, U.F.A., president and leader of the Progressive group in the House of Commons. Much will depend upon the mutual arrangement for the division of available markets. The solution, he thought, would be an arrangement by Canada, United States, Russia, Argentina and Australia to permit orderly marketing of the export surplus of each of these countries to their mutual advantage. This, if developed, would involve development of centralized marketing from Canada, possibly under government auspices.

The other alternative would be a compulsory pool, Mr. Gardiner said, although he had been opposed to this method.

No Cancellation Likely

Serious Hardships Would Attend Reduction In Air Mail Service

Ottawa, Ont.—It is unlikely there will be any cancellation of existing air mail contracts it was stated on excellent authority here. The need for exercising economies in the post office department, coupled with the necessity for overtaking some of the \$5,000,000 deficit with which the department completed the fiscal year, had given rise to the expectation that the government would reduce some of the unremunerative services, in which category the air mail service is understood to fall.

Cancellation of the contracts, however, would have entailed considerable hardship inasmuch as in the expectation of a continuance of the services, several companies had incurred large capital expenditures in establishing air transportation organization.

Borrowers In Difficulty

Montreal.—Farmers who have attended to business are all right, only the farmers who have borrowed money and now have interest charges to carry for having sought a shortcut to prosperity through a broker's office are in serious trouble, Senator D. E. Riley, High River, Alberta, rancher, said on reaching this city.

History Books Criticized

Toronto, Ont.—Accumulation of dates and facts in history text books had developed in students a hatred of Canadian history, declared W. S. Wallace, librarian of the University of Toronto, addressing Ontario Educational Association here.

Soundproof telephone booths have been installed at one California airport.

The U.S. government maintains 93 schools for natives in Alaska.

SAYS RUSSIA DOOMED

W. E. Clifford, Montreal engineer, recently arrived from Moscow, U.S.S.R., who declares Russia is despotically controlled by Communist fanatics, and that the country is doomed to failure.

Projects For Churchill

Two Million Dollars Worth Of Building Material Being Assembled

The Pas, Man.—Two million dollars worth of building material is being assembled and plans are under way for the employment of 1,000 men for work on the 2,000,000 bushel elevator project at Churchill, terminus of the Hudson Bay Railway.

Material is being assembled in Winnipeg and 30 trains of 40 cars each will be required for the shipment of steel and equipment to Manitoba's seaport. Work on the elevator project will be well underway by July 1, contractors stated.

Churchill will have its first hotel this summer and the first test shipment of grain will be made from the port in September, according to Hon. D. C. McKenzie, Minister of Natural Resources. No "boom" conditions will be permitted.

Soviets Extending Air Service

Ambitious Civil Aviation Program Announced By Government

Moscow, Russia.—Coincident with the opening, May 1, of several Russian passenger and mail aero lines, the Soviet Government announced an ambitious civil air program. Some 13,000 student aviators are in training and a total of 172,000,000 rubles is budgeted for civil aviation in 1931. Plans call for extending the passenger and mail lines over 25,000 miles and installing fifty new aerodromes and 250 landing fields.

RUSH ANTITOXIN BY PLANE

Chief Pilot Joe Crosson (in fur flying kit) of the Alaskan Airways, loading antitoxin aboard his fast small Stearman plane before making a dash to Point Barrow for the relief of diphtheria-threatened Eskimo residents. Three are reported as already seriously stricken with the disease. The plane was commissioned for the flight by Alaska Territorial Health Commissioner De Vigne. Dr. Henry Greiss, Presbyterian missionary physician at Barrow, performed the inoculations.

Doubts Quota Policy

British Miller Thinks Wheat Scheme Is Too Dangerous

London, England.—John Westgate, of Liverpool, who is an officer of the National Association of British and Irish millers, is inclined to doubt the report that the government is considering the imposition of regulations requiring British millers to take 15 per cent. of requirements from wheat growers in the United Kingdom.

No definite scheme has been submitted to the millers by any political party, he said.

"It is perfectly certain that no legislation is possible without the millers' agreement," said Mr. Westgate, in an interview with the Manchester Guardian. "The quota system is far too dangerous to be acceptable. And the English wheat policy at present is insufficient to constitute a 15 per cent. quota."

Anglo-German Conference

Matters Of Vital Importance Will Be Discussed

London, England.—Matters of the utmost importance in European policies will be discussed from June 5 to 9, when Chancellor Bruening and Foreign Minister Julius Curtius, of Germany come to England for a conference with Premier MacDonald and other British statesmen.

Among the questions expected to be considered are general disarmament, especially in relation to the Geneva conference early in 1932, and the Austro-German economic pact, but no topic of significance to European politics is likely to be barred.

Official British circles take very calmly the suggestion that other European powers had been somewhat ruffled by the exclusive nature of the conference.

Canadian Wins Medal

Honor Goes To Deputy Minister Of Department Of Mines

Ottawa, Ont.—A signal honor has been conferred on Dr. Charles Cammell, deputy minister of the Department of Mines. A cable from London announced that he had been awarded this year's gold medal by the British Institution of Mining and Metallurgy. One medal is awarded each year to the person, without regard to nationality, whom the institution decides is the most deserving.

May Delay Radio Hearing

Ottawa, Ont.—Preparation of the case for the Dominion Government on the radio reference to the supreme court of Canada is not completed, and expectation is that an adjournment will be asked.

ARGUE QUESTION OF RESOURCES COMPENSATION

Ottawa, Ont.—The amount of compensation to be paid to Saskatchewan and Alberta by the Dominion for alienation of their natural resources from 1905 to October 1 last, the date of return, may be decided upon by the same commission for both provinces. This suggestion, it is understood, was under consideration at a meeting between Premier R. B. Bennett; Hon. T. G. Murphy, Minister of Interior; Hon. M. A. MacPherson, Attorney-General of Saskatchewan, and Premier J. E. Brownlee, of Alberta. No official statement, however, was made.

Under the respective agreements between the Dominion and the two provinces, entered into more than a year and a half ago, the amount of compensation to be paid to Saskatchewan and Alberta for alienation during this period was not fixed. Commissions were to be appointed and, in the case of Alberta, one was named, but no such step was taken in regard to Saskatchewan. What the personnel of the commission would be if the same body is to function with regard to both provinces is uncertain at the moment, assuming that such a suggestion is acted upon.

Further discussion will take place on this point and in the matter of the turning over by the Dominion of certain records to these provinces. In addition, Saskatchewan has an appeal pending before the judicial committee of the privy council asking for an accounting by the Dominion in respect to the administration of that province's natural resources prior to 1905.

Reduced Railway Fares

Drastic Cut For Summer Week-End Trips Is Announced

Montreal.—Drastic cuts in fares on Canadian railroads for the summer week-ends were announced by C. T. Riddell, chairman of the Canadian Passenger Association, after a series of conferences. The new scale will go into effect May 1, and will continue through June and July. The new round trip fare from Friday noon till Monday midnight will be only one and one-quarter times the present single fare.

The reduction will be of special benefit to those passengers wishing to week-end in the country.

The present round trip fare for 100 mile journey is \$6.20 and under the new week-end rate will be only \$4.35.

The reductions will apply between all stations in Canada and will commence with the first week-end in May.

Cost Is Prohibitive

Winnipeg-Calgary Air Mail Letters \$37 Each Is Report

Calgary, Alberta.—Air mail letters between Calgary and Winnipeg are costing on an average \$37 each, according to statements made here by Dr. G. D. Stanley, M.P. for East Calgary, who has just returned from Ottawa.

Government investigations have revealed the prohibitive cost of the present air mail service, he said, and these surveys show that Calgary sends two letters by air for every one sent by Winnipeg.

Viscount Secures Motor License

Ottawa, Ont.—Viscount Duncannon, son of the Earl of Beasborough, lost no time on his arrival in Ottawa in securing his license to operate an automobile. The Governor-General and his family arrived at Rideau Hall shortly before noon. Four hours later Viscount Duncannon was at the office of motor license to secure his permit.

Hangar To Be Rebuilt

Winnipeg, Man.—Plans for rebuilding of the Western Canada Airways hangar here, destroyed by fire a short time ago at a loss of about \$200,000, have been completed and tenders on the construction called for. The new hangar will be about the same size as that destroyed.

Editor and Publisher

FREE PUBLICITY

This office has been for the past
year, and still is, receiving every week
through the mails numerous "stories"
from many large manufacturing con-
cerns in the East. These articles deal
principally with the business of the
firm sending them out to weekly news-
papers all over Canada, and in other
words it is advertising matter which
the publisher is asked to print free of
charge. In this way these firms, who
realize the power of advertising, ex-
pect to get publicity without paying
for it, and in many cases they succeed
in doing so. Yet these same manu-
facturing concerns, when placing their
advertising, pass up the weekly news-
papers and devote their money to
daily newspaper space. They do this
because the daily newspaper will not
print their articles free of charge, but
insist on a certain amount of adver-
tising before they will devote any
space to free publicity. This paper is
following along the lines of the daily
newspapers in this respect. Wherever
any advertising matter appears in a
reader we consign said reader to the
waste paper basket.

If the manufacturers would spend
the money in real newspaper advertis-
ing, that they spend in sending out
this material for free publicity, they
would get better results for their money.
Some newspapers print their public-
ity articles, but the majority of pub-
lishers have learned that the more

free publicity they give to a manu-
facturer, the less real paid advertising
he gets.

GETTING OUT A PAPER

Getting out a good newspaper, is a
fascinating task. No other job that
comes to mind is quite so taxing, so
hurried, or demands greater pains.
From the moment a newspaper is
started, be it either a daily or weekly,
the work is carried on under pressure,
a race against time. Put yourself in
an editor's position—could you do it?

Could you, for example, spell correct-
ly off-hand the names of a large per-
centage of the residents of the town?
If you could do that, could you write
their initials correctly without resort-
ing to the telephone directory, or other
authority?

Could you write down, offhand, the
names of your city officials, your local
school board, your country officials,
getting all the names, initials and of-
fices correct?

Could you gather the threads of a
story from half a dozen persons and
weave it into an intelligent, readable
account the first writing?

Could you write seven columns of
material of 1200 or 1400 words each
in two or three days, week after week,
year after year, and when you had
finished these seven, pound out two
or three more before press time?

In writing a heading could you call
to mind in a moment enough synonyms
so that you would not repeat the same
thought in the same words?

Could you judge in a minimum of
time what size headlines and what
position in the paper could be given
to each of the 75, 100 or more stories
that might go into the paper?

Could you decide in a moment or
exercise "snap" judgement on the doz-
ens of questions a newspaper man
must face daily and get a majority
of them correct?

We won't tire you—but if you could
do these few simple things and a
thousand and one more difficult ones,
you should be a newspaper editor.

The point we wish to make is that
one can produce a good newspaper
only after continual diligent study and
years of practical experience. You
have heard dozens of persons remark
that they could turn out a newspaper
and a good one, too, a bit better, in
fact, than the one they are getting.
That is not true unless they have gone
through the years of study that a good
newspaper demands of its makers.

Were it not for the peculiar fasci-
nation associated with newspaper work
there would be no newspaper, for there
is no greater taskmaster and money
alone would be far too scant compen-
sation.—Linetype News.

Snicklefritz -----

"You sell anti-knock gas?"
"Yes Sir."
"Let me have a pint, I want to rub
some on my girl's knees."

First Reveller: "It's lucky our wives
don't know where we were last night."
Second Reveller: "Very lucky. By
the way, where were we?"

Husband—I've got to get rid of my
chauffeur, he's nearly killed me four
times."

Wife—"Oh, give him another chance."

She—Can you draw?
He—A little—why?
She—Then draw closer.

A Kansas stockman, who had mort-
gaged his cattle to the local bank, was
called in by the banker and told that
the note was due and must be paid
the following day. The stockman asked
the banker:

"Were you ever in the cattle busi-
ness?"

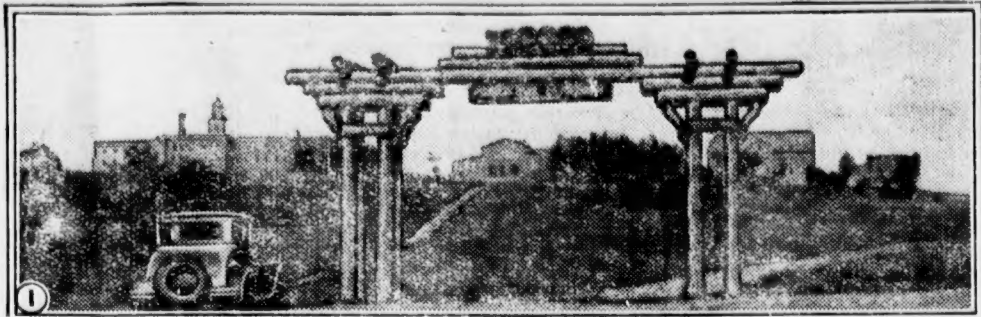

The banker answered "No."
The cattleman said: "Well, you are
now," and walked out.

It was a good many years ago that
Deacon Callahan took his wife to the
races.

Just as the horses were lining up
at the barrier, Mrs. Callahan grasped
the deacon nervously by the arm, and
in a voice which was filled with emo-
tion asked him for a safety pin, mean-
while grabbing frantically after some-
thing that seemed to be slipping
around the knees.

Just then some one nearby shouted:
"They're off!" And Mrs. Callahan
fainted.

Immortalizing Pioneer Priest

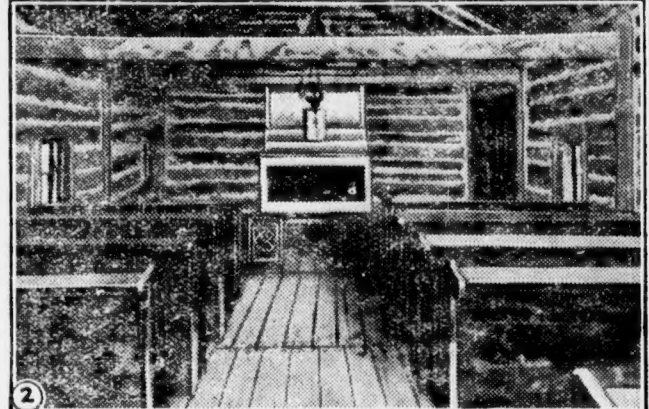

One of the most colorful figures
of the development of the
Canadian West is immortalized
today, at the scene of his labors,
St. Albert, on the Sturgeon River,
just outside Edmonton, by the
preservation in the Mission Park
of the Oblate Fathers of the
original "cathedral" and mission
which he founded in 1860, under
orders from His

Lordship
Bishop Tache,
of St. Boniface,
and in which
he carried on
his work until
his death in
1916. This ce-
lebrity is no
less renowned
a personage
than Rev.
Father Albert

Lacombe, after whom Lacombe, Alta. is
named, and who played such an important
part in the pacifying of the warring Indian
Tribes of the West and the building of the
Canadian Pacific Railway. His untiring efforts
in the latter connection won him special
recognition from Sir William Van Horne, its
president, who not only gave him a permanent
pass on the line, but made him its head for
one day. From the day of his arrival in
the West in 1849, from Quebec, where he
was born in 1827, this brave and energetic Oblate had staunch friends among
the Indians and continued to establish himself, both among them and the
white population, as one of the best-known and most-loved characters of the
most stirring days of the Prairies. Apart from his religious activities, Father
Lacombe is known as one of the real Westerners of Canada. The country was
in a very undeveloped state when he first established himself in it and Mission
Park, today, stands for a great deal more than just a mission station.

or the scene of a devoted missionary's labours. It is a mile-
stone in the progress of the Canadian West and, hence,
in the progress of the Dominion. The pictures show:
(1) the approach to Mission Park, (2) the interior of
the old "cathedral," (3) its exterior, with the brick
building which now encloses the old log church, and,
(inset) the statue of Rev. Father Lacombe.

CHAPTER XV.

On a day some two weeks later, the unusual sight of Julie Nipps, clad in a blue sport coat of obviously modish cut, might have been seen on Main Street. She was pushing a go-cart in which sat little Martha, clasping in her arms the doll for which Halliday had sent to Boston. Julie felt proud both of her coat, and of the little girl, who wore a dainty pink gown that brought out the color in her cheeks. In a desire to display her finery she promenaded the length of Main Street's "shopping district," then turned to the north, and a less dusty thoroughfare. To all appearances she was "taking her time," which in Julie's busy life was something unaccustomed. She hesitated as she approached John Maxwell's fine old house, and at just that moment Mary Maxwell appeared in the wide doorway.

"Come in, Julie. Is that the little girl who's staying at the Halliday's? I want to see her."

Julie was not loath to obey. She was genuinely fond of Mary Maxwell, whose house-cleaning she had done for years. Mary was also fond of Julie, who was an unfailing source of amusement during the spring upset. She noticed the coat at once, and spoke of it.

"Aren't you looking pretty fine?"

Julie flushed with pleasure.

"Mis' Halliday give it to me. She said she bought it by electric light, and when she got home and begun wearin' it she found it didn't blend with her eyes. Them's her own words, Mis' Maxwell. Would you believe a grown woman'd be so silly? Yes, this is Martha. Shake hands with

the lady, dearie—there's a good girl." Martha drew shyly back, but at Mary Maxwell's smile she stretched out her arms.

"What a darling!" said Mary, lifting the little girl and seating herself in a comfortable rocker. "Come up on the porch, Julie, and rest a minute if you have time."

"Oh, I got time enough," replied Julie, accepting the invitation with all the ease of a free-born, small-town American. Mary once told her husband that if the President of the United States should invite Julie Nipps to dinner, she would go through the proceeding with no uncomfortable qualms as to her fitness. She seated herself now in John Maxwell's favorite chair, and proceeded to rock almost as rapidly as she talked.

"She's gone to Boston to see about opening up their apartment for the winter; and he's gone to Anton Bay to see an old aunt or somebody. He didn't go till after she left. Guess he didn't want her to find it out. So my time's my own till supper. Look out, Martha, you'll be breakin' the lady's beads if you pull on 'em like that."

"No, she won't," contradicted Mary. "They've withstood the hands of five children and seven grand-babies. Well, Julie, if the Hallidays go back to the city you'll be out of a job. Perhaps you'll do my fall cleaning if I leave it long enough."

"Well, now I'd thought o' that myself; but it seems they ain't goin' to take Martha with 'em. Maybe there ain't room in that flat, but it's my opinion that she won't have her. Anyhow, I'm to stay right on and be sort of caretaker for the house and little Martha too. It'll be some lonesome, but Mr. Halliday said he'd make the pay all right, and I will say he may have a long face but he ain't got a mean bone in his body. Sam Toomy's to come every day to fix the furnace and bring up coal and wood. I'll live like a lady. Say! I see in the Boston paper that his ma left him a pot o' money—him and his sister. I guess Mis' Halliday knew which side her bread was buttered on when she took him."

"Oh, Julie! you really shouldn't say such things. Of course she cared for him."

"Take it from me," replied Julie, unabashed at this reproach, "that woman don't care for nothin' but her complexion. And I'll tell you another thing, Mis' Maxwell, though I wouldn't say it if I didn't know you ain't one bit of a gossip; Mis' Halliday is one o' them women they call a vamp!"

Julie made this announcement with such fine oratorical effect that Mary Maxwell was forced to stifle a laugh, even in her amazement that Julie should agree with her own conclusions regarding Angela Halliday. She hid her smile behind little Martha's curls before she answered:

"Mercy, Julie! What a thing to say about your mistress!"

"Excuse me, Mis' Maxwell," Julie corrected, "but I never called nobody that yet, and at thirty-four years old I ain't goin' to begin. She's the lady I'm accommodatin'. I read in a magazine that that's what you call a person who helps out at a critical time, most any time would be critical if Mis' Halliday did the cookin'. She don't know salt from sody."

"She's an artist, you know," suggested Mary kindly. "Some artists aren't as practical as the rest of us."

"Well I'll tell the world she's practical enough to know what pleases a man, though she don't try extra hard to please her own. She's like them women in the movies, Mis' Maxwell, them that don't appreciate a good, steady feller when they got him, but is always runnin' after some other woman's husband. Now them Myers what visited her—he was about as handsome as a stuffed piller case, but he wore pants and was somethin' Mis' Halliday could make eyes at. One night—"

"Really, Julie," interrupted Mary conscientiously, "you ought not repeat these things, I—"

"Don't let that worry you a minute, Mis' Maxwell," broke in Julie. "You've been good as a mother to me ever since I lost my own. I ain't forgotten how you fixed me that elegant black dress for the funeral, and if I can live you up with a little news about the Hallidays, why it's my Christian duty to do it. I was goin' to say that that puffy Myer man did for a time, but now he's gone and there ain't no one handy for her to make eyes at but Nick. I've known Nick Hastings ever since he wore short pants, and to see him sittin' on the veranda bein' made a fool of, gets my goat."

"What do you mean?"

Mary Maxwell threw her scruples to the wind as she asked the question; while Julie, enjoying the role of news-monger, spoke mysteriously.

"'Twas last night. Gay had run over to carry a glass o' jelly to Sadie Twichell. The babies were a-bed, and Nick was supposed to be lookin' out for 'em; but Mis' Halliday see him an' called him over. He'd gone for a walk—Mr. Halliday, I mean, and I was puttin' away the silver in the sideboard; that is, I'd been puttin' it away, and had set down a minute by the window. They was right outside and I couldn't help hearin' what they said."

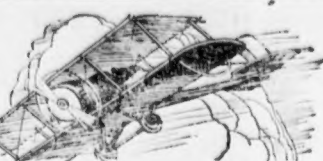

"But, Julie, it's not honorable to listen to conversations that way."

"I wa'n't listenin'. I was restin' my feet. Mis' Halliday give me a pair o' pumps she got tired of, and they ain't properly broke in yet, so I set down by the window and slipped 'em off. And just then she give a sort o' call. It sounded for all the world like a bird, and I looked out and see Nick come through that hole in the hedge. They set down together outside the window and I heard her say: 'We both seem to be deserted, Mr. Hastings,' and Nick laughed and said: 'Then let's console each other. Isn't it a bully evenin' for September?'"

"Well, Mis' Maxwell, I started to move but I was afraid they'd hear me, and anyway my feet weren't anywhere near ready to be squeezed into them pumps. Besides, if Nick Hastings was goin' to do any consolin' I wasn't goin' to miss it. I ain't forgot how Gay trimmed a hat for me once when I was cleanin' Sadie Twichell's attic, and if Nick cuts up any monkey shines with Mis' Halliday same as that Myer feller did, he'll get a piece o' my mind."

Mary Maxwell, who had buried her conscience deep and was shamelessly

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

We had slipped down the burning slope, expecting every minute to be our last, then found ourselves falling into space. We shut our eyes, rather than see the fiercely burning furnace that we believed lay below—then suddenly I found myself choking for breath, deep down in the cool swirling depths of a mountain pool.

I fought my way to the top and found Scottie swimming in circles up there on the surface, looking for me with a most doleful expression on his whiskered face. Above us the woods burned brightly, and down stream the river disappeared in a smoke filled tunnel of flaming trees. It was through that tunnel we must go if we were ever to get out. The air was alive with hot cinders—and the light was so uncertain that we had no idea whether

the sun was shining or not. When the water grew shallow I waded around slippery boulders, and crawled over ledges where the swift, white current pulled and tugged at my clothes and often swept me off my feet. It was painfully slow work for both of us. Scottie was clutched under my coat and I staggered along as fast as I could. Soon the stream narrowed, and the rock ledges on either side rose to a height of twenty feet or more. It was a regular gorge. Up over us the woods were burning fiercely, but above the crackle and roar of the flames rose another sound—a sort of deep bass rumble like thunder that broke through a long drawn out note. Falling water and not very far ahead!

The current grew deeper and swifter, and the gorge continued to grow steeper and narrower. I clung to a ledge for support while I rested.

"Scottie, my boy, it's certainly lucky you know how to swim." He wriggled his stubby little tail as I spoke to him. "Just as sure as you're a funny looking Scotch terrier, you're in for a try at it. But how are you for swimming waterfalls?" Sure enough. Not a hundred feet along, the stream dropped over a ledge. I crept as closely as I dared. Apparently the water fell twenty-five or thirty feet into a round basin and the gorge was considerably wider at that point. It looked for all the world as if some giant with an auger had bored this big hole in the rock, into which the water tumbled and hissed.

Suddenly, even as we stood there a few feet from the edge, there was a droning sound overhead, and in a moment more

a plane passed, flying low. By the sound, it was good old Vickers, but the smoke was so thick we couldn't see a thing of it. I yelled at the top of my lungs and Scottie barked—but we might as well have been whistling in a hurricane in Greenland. Why, we could not even hear ourselves.

Slowly, step by step, we retraced our way back through the gorge. On a flat rock in the stream we sat down to think—the bank was too cool for comfort and the rock was none too cool. Taking off my leather jacket, I carefully cut the heavy leather into strips, using the sleeves and all. When fastened together these strips made a strong rope about ten or twelve yards long.

Now for a place to tie it at the head of the falls. I needed a log that could be wedged securely between the walls of the gorge—that would do it. Finally I found one the right size. Half floating it, I made my way towards the edge of the falls. One false move—and over I'd have gone! Carefully I worked one end into a crevice in the ledge. With one end anchored I pushed the other into place against the opposite wall of the gorge. Then I went back for Scottie.

From my shirt I made a sling. With one end of the rope twisted around my waist, I braced myself against the tree and lowered Scottie down. The rope just reached, and he climbed out on the side of the basin. My turn came now. I straddled the log, took a tight hold of the leather rope, and slipped over. The force of the falls was tremendous. The rope slipped through my fingers, and I spun dizzily around, and with a thump I landed in the shallow water at the edge of the basin. I climbed wearily out and there was Scottie watching me on the bank.

The stream widened as we went along, and the walls of the gorge dropped so that the banks were only a foot or two above stream.

The woods seemed to be getting lighter ahead. I pushed on faster—and there we were on the edge of the nicest little mountain lake you ever saw. Far up to the right the fire was rapidly working down to the lake. To our left the woods were burning almost to the water's edge. We were hemmed in again.

Suddenly there was a scrambling in the underbrush—some heavy animal scratching through. Scottie remembered the bears and stood still with every hair standing straight out like a porcupine. The crashing grew nearer . . .

New Radio Process Tested

Uses Only Enough Power To Operate Flashlight Bulb

A new radio process which uses just enough power to light a flashlight bulb, threw voices across the English Channel when it was demonstrated by the International Telephone and Telegraph Company. The device uses a half watt of power and operates on a wave-length of eighteen centimetres.

The aerials are less than one inch long. Conversation was clear and distinct. The process used a radio beam travelling in a straight line.

Douglas' Egyptian Liniment is recommended for sore necks, galls, distemper, callouses and spavins. Removes proud flesh and Hoof Rot. Stops bleeding instantly.

It has been estimated that 20,000,000 meteorites enter the earth's atmosphere from outer space every day.

Little Helps For This Week

"Speak unto the children of Israel, that they go forward."—Exodus xiv. 15.

Therefore think not the Past is wise alone. For yesterday knows nothing of the Best. And thou shalt love it only as the nest, Whence glory-winged things to heaven have flown.

—James Russell Lowell.

Let us have done with vain regrets and longings for the days that will never be ours again. Our work lies in front, not behind us; and "forward" is our motto. Let us not sit with folded hands gazing upon the past as if it were the building; it is but the foundation. Let us not waste heart and life thinking of what might have been, and forgetting the "may be" that lies before us.

—Jerome K. Jerome.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

"Dr. Blank has a new car."

"I know it! I helped to pay for it."

When You OVER— INDULGE

EVERY man, woman and child will occasionally over-indulge. But don't suffer for your indiscretions. It's folly to do so when you can so easily sweeten and settle a sour, upset stomach with a little Phillips' Milk of Magnesia.

Hearty eaters have long since learned the quick comfort this perfect anti-acid brings. Smokers know how it neutralizes nicotine; brings back a sweet taste; guards the breath. Women know what it does for nausea—or sick headache. And when children have over-eaten—are bilious, constipated or otherwise upset—give them a little of the

same, pleasant-tasting and milky-white Phillips' Milk of Magnesia.

You'll be through with crude methods once you learn the perfect way. Nothing else has the same quick, gentle effect. Doctors prescribe it for indigestion, nausea, heartburn, gas, sour stomach and headache. It has been standard with them for over 50 years.

Insist on genuine Phillips' Milk of Magnesia; a less perfect product may not act the same. The genuine is always a liquid—never in tablet form—and the name Phillips' is always on bottle and wrapper.

THE CHRONICLE

The annual meeting of the Anglican
Church was held in the Farmers Ex-
change hall on Friday last.

The Play "No Account David" which
was to show in the Elks Hall last
night, was postponed on account of
the illness of Miss Longstaff, who was
injured in Calgary.

Rev. Attwood of Calgary was the
guest at the home of Mr. and Mrs. W.
Poxon on Saturday and Sunday of
last week.

Born to Mr. and Mrs. A. McLeod,
in Calgary on Wednesday, April 8th,
a son.

The Harry Dolphin family have re-
turned to Carbon after an absence of
over three years.

H. Birch and son Allen of Cluny,
were Carbon visitors on Monday.

Cyril Poxon left Tuesday for Cal-
gary, where he is attending Mt. Royal
College.

Mrs. J. Ramsay and Mrs. Fox were
Calgary visitors last week.

Mr. and Mrs. Govin and family re-
turned Saturday to their home near
Rosebud, after spending the winter at
the Charlebois home.

Miss Ella Halstead returned Sunday
to her school near Craigmyle.

Miss Mabel Ramsay and Molly Laing
returned to Calgary on Sunday. Jack
Spence took them in by automobile.

Hugh MacDonald returned Sunday
from Medicine Hat, where he spent
the Easter vacation with his mother.

J. Tabert is putting up another house
on the "Island."

Miss Phyllis James returned to her
school near Oyen, on Saturday.

Mrs. S. J. Garrett and son were vi-
sitors to Drumheller on Monday.

The Bank of Montreal inspectors
have been in Carbon the past week
checking over the local branch of that
institution.

The Misses Belle and Helen Smith
spent Friday in Calgary.

The Misses Olive and Anna Charle-
bois motored to Calgary on Thursday.

Mr. and Mrs. W. Mancel celebrated
their 50th wedding anniversary on
Saturday, April 11th. A party was held
at the home of Leonard Mancel, to
celebrate the occasion. Bridge and
whist occupied the greater part of the
evening's entertainment. Mr. and
Mrs. Mancel are old timers in the dis-
trict, having been 27 years in Carbon.

NEW BUS ON-DRUMHELLER RUN

W. Poxon and Son have added an-
other bus to their line and will now run
from Trochu to Calgary and return
daily. The new bus is a 24-passenger
White and of the latest type. This big
bus is being put on the Calgary-Drum-
heller run and the old bus is being put
on the Trochu-Calgary run. The 7-
passenger Buick will be on the Carbon
end of the run, and will connect with
the Drumheller bus for Calgary.

FARMERS ON LAND NOW; MANY FINISHED SEEDING

This past week has seen most of the
farmers in the district on the land,
either harrowing or seeding, and it is
expected that the crop will be put in
in record time this year. Many of the
farmers south of Carbon have com-
pleted their wheat seeding and by the
end of the week will have their entire
crop in the ground. To the North the
work has just begun.

The seed bed is pretty dry and many
are waiting for a good rain before
commencing operations. The winds
have been so bad this year that, with
the land drifting farmers are not tak-
ing chances of re-seeding, and should
they have to do so the majority would
not have the seed.

What the district needs is a good
48-hour rain.
